CONNOR

Ci sono alcuni arredi che rendono i nostri spazi luoghi reali, che creano valore a lungo termine e non effetti emozionali transitori. È questo il caso del nuovo divano modulare firmato Borzalino, un pezzo di quiet refinement lungimirante ed altamente personalizzabile. I cuscini di Connor vengono sollevati da terra da due slitte in legno massello, quindi adagiati su un piano a vista rivestito in pelle, una sorta di tappeto volante su cui si spiegano sedute dalle linee aperte e ripiani funzionali alla destinazione d'uso dell'arredo. Lo schienale ed i braccioli di questo importante sofà sono pieni e corposi, modellati per accogliere, assecondare e proteggere il corpo umano.

Struttura: in tubolare metallico. **Imbottiture:** schienali e braccioli in poliuretano espanso di densità 40/35 kg/m³ e rivestiti con trapuntino in piuma canalizzata per garantire una localizzazione della piuma netta e costante nel tempo. Il trapuntino in piuma conferisce morbidezza e sofficià. Sedute volanti in poliuretano espanso a quote differenziate di densità 38/30 kg/m³ a loro volta rivestiti in trapuntino in piuma. **Dettaglio:** ricamo R2 centrale sul cuscino schienale con leggera tiratura per conferire movimento. **Zampe:** legno massello di Rovere verniciabile in varie finiture o Noce Canaletto.

EN There are certain furnishings that make our spaces real places, creating long-term value rather than transient emotional effects. This is the case with Borzalino's new modular sofa, a forward-looking and highly customizable piece of quiet refinement. Connor's cushions are lifted from the floor by two solid wood slides, then placed on an exposed leather-covered top, a sort of flying carpet on which open-line seats and shelves functional to the furniture's intended use are unfolded. The backrest and armrests of this important sofa are full-bodied, modeled to accommodate, support, and protect the human body.

Structure: tubular metal. **Padding:** backrests and armrests in expanded polyurethane with a density of 40/35 kg/m³, and covered with channeled down feather quilting to ensure clear and constant localization of feathers over time. The feather quilt gives softness and tenderness. Flying seats in polyurethane foam of different densities of 38/30 kg/m³, also covered with channeled down feather quilting. **Detail:** central R2 embroidery on the back cushion with light stretching to give movement. **Legs:** solid oak wood that can be painted in various finishes or Canaletto walnut.

FR Il y a certains meubles qui rendent nos espaces des lieux réels, qui créent de la valeur à long terme et non des effets émotionnels transitoires. Voici le tout nouveau canapé modulaire Borzalino, un élément de relaxation visionnaire et personnalisable. Les coussins d'assise du modèle Connor sont soulevés du sol grâce à deux élégantes pieds en bois massif, et posés sur une base apparente recouverte de cuir. Cette structure, qui ressemble à un tapis volant, renferme des sièges aux lignes ouvertes et fonctionnelles, parfaitement intégrés dans le canapé. Le dossier et les accoudoirs de ce canapé raffiné sont généreusement rembourrés et doux, conçus pour accueillir, soutenir notre corps.

Structure : tube profilé rectangle en fer. **Suspension d'assise :** cadre et treillis métallique. **Support de dossier :** cadre et treillis métallique. **Rembourrage :** dossier et accoudoir fixe en mousse polyuréthane densité 40/35 Kg/m³ couverts par un couette en duvet à secteurs pour garantir au duvet une localisation nette et constante dans le temps. La couette en duvet donne douceur et souplesse. Coussins d'assise amovible en mousse polyuréthane densité 38/30 kg/m³ également revêtus par un couette en duvet à secteurs. **Détail :** broderie R2 sur le coussin du dossier avec un léger tirage pour apporter du mouvement. **Pieds :** en bois de chêne ou de noyer Canaletto massif teinté en différentes finitions.
